Guardian Audio® was designed to meet the needs of beginner to professional. We offer quality products for sound reinforcement applications such as practice systems for aspiring bands, electronics and loudspeakers for small and large venue, and commercial grade equipment for churches, permanent installation and touring. Each item is designed for ease of use while offering a wide range of features, functionality and durability. We hope your experience with Guardian Audio® exceeds your expectations.

Guardian Audio® is wholly owned by MottAudio LLC, a Christian family owned business in Indiana, USA. Guardian Audio® is a registered trademark of MottAudio LLC. All rights reserved. Product and pricing subject to change without notice.

Guardian Audio® Articulated Line Array Series

Guardian Audio articulated line array series speakers are specially designed to solve problems for production crews and installers for any venue. The high pass cabinets can be run in passive or bi-amp mode, allowing for easy setup and maximum control. In passive mode the internal crossover for the LA210 incorporates a lamp fuse for superior driver protection. The proprietary horn design uses three highly efficient neodymium drivers.

High Pass	LF Driver	HF Driver	RMS/Peak Power	Sensitivity (1w/1m)	Frequency Response	Impedance
LA210	10"	3 x 1"	400 / 1600	108dB	60Hz~18kHz	16Ω

Sub-woofer	Woofer	RMS/Peak Power	Sensitivity (1w/1m)	Frequency Response	Impedance
LA212S	2 x 12"	500/2000	110dB	40Hz~500Hz	4Ω
